This manifest is required as part of your Kern River Use Permit. If there is more than one river use permit holder in your group, one manifest can be used to include all crafts and passengers as long as the number does not exceed the maximum group size allowed on a particular Kern River run. The information collected can be useful in search and rescue efforts, as well as, in reporting private whitewater boating use on the river.

Please utilize a pack it in & pack it out method. Trash and litter have no place on river corridors. Set a good example - pick up litter left by others. Be sure to properly dispose of human waste and gray water.

Now take a moment below and let us know about your experience on the Kern River today. Your comments are welcome!
